

Price History Review Workshop

One day workshop, onsite or virtual

The Price History Review Workshop is designed to give your team the tools and knowledge necessary to conduct successful pricing analysis with AASHTOWare Project Data Analytics. Attendees will be trained to identify items of interest, recognize trends, and learn which items have the greatest dollar impact on your highway construction program.

Agency Outcomes

The goal of this workshop is to further develop your team of analysts as they learn to elevate their analysis to perform item reviews. In contrast to a beginner-level workshop, this workshop helps teams build out a robust analysis skillset. By the end of the workshop, your team will gain enhanced literacy of analysis concepts, as well as a deeper understanding of the tools and technical knowledge required to perform successful analysis.

Learning Objectives

-  Understand pricing trends across several criteria, such as area, over time, quantity levels, etc.
-  Identify the items that have the greatest dollar impact on your construction activities
-  Establish best practices and parameters for item review
-  Incorporate analytical tools into your item review workflow

The Workshop

Our Price History Review Workshop offers a mix of hands-on training, discussion, and detailed presentation. The workshop will focus on:

Introducing attendees to regression concepts and analysis tools

Diving into process like Price History Analysis, Bid History Review, Top N, and more

Providing attendees with hands-on, instructor-guided analysis experience

Establishing a set of best practices for continued analysis

As your partner in analysis, Infotech is here to answer any questions you may have about workshops or the AASHTOWare Project Data Analytics SaaS module.
