

AASHTOWare Project Data Analytics™

AASHTOWare Project Data Analytics puts your agency in the driver's seat to make well-informed, data-driven decisions. Tailored specifically to the highway construction industry, this module is built to maximize the potential of the AASHTOWare Project unified database. Analyze data, find patterns, and draw key conclusions throughout the entire construction process.

DATA-DRIVEN DECISION MAKING

Drive Analysis Forward

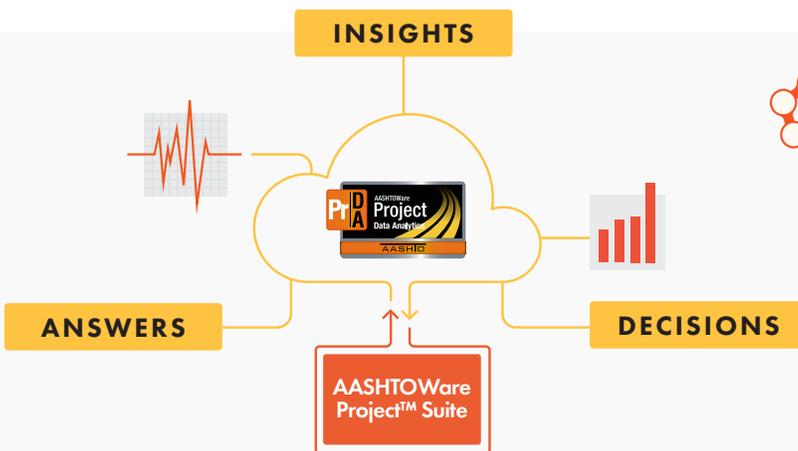

Unlike other generic analysis programs, the Data Analytics module was designed specifically for agency infrastructure construction management. Improve decision making with a toolkit built for analyzing broad sets of current and historical data.

- Summarize key data with executive and analyst dashboards
- Quickly analyze vendor bidding patterns for irregularities.
- Identify price trends using in-depth item analysis
- Provide portfolio reporting on items, proposals, or vendor bids in counties, districts, or even user defined markets.

Benefits of a Software-as-a-Service (SaaS)

The Data Analytics SaaS platform benefits from a number of features that improve efficiency, access, and implementation.

- Minimal user training, minimal IT support, and no agency deployment needed
- The rapid delivery of the SaaS model means you are always up-to-date with the latest new features.
- Responsive UI that works well on desktop, laptop, and mobile browsers.

VISUALIZE THE FULL LIFECYCLE OF YOUR CONSTRUCTION DATA

Break Down Silos

All AASHTOWare Project modules work seamlessly together in a unified database, promoting collaboration and acting as a single source of truth for your construction portfolio. New features, enhancements, and even modules come at the direction of key user groups.

- Inform regular feature updates and improvements with comprehensive user feedback functionality.
- Use and analyze data from the estimate, letting, bids, construction, materials, civil rights and labor modules.
- Integrated with the rest of AASHTOWare Project software to maximize the unified database.
